Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner discussed claim 9 and his reason for withdrawing the enablement rejection. This is basically because due to the requirement of the probe-label system being subjected to chemical or photochemical ionization, the claim is limited to mass spectral analysis. Thus the claim language is supported by the instant specification. This claim does not limit the detection of all claims to mass spectral analysis. It also does not set a requirement for a detection limit of the probe-label system compared to the probe by itself for any detection technique other than mass spectroscopy. .
